Hanging rail integrated in side strip - suitable for recessed ceilings using a side strip

The Art Strip is the picture hanging system that may be hidden in a recessed ceiling. It replaces the side strip which is used for the installation of recessed ceilings. During a tear-down phase or renovation work, the Art Strip can be installed at the same time as the recessed ceiling. The corner profile for the recessed ceiling is then mounted to the Art Strip. When you mount the Art Strip during the installation of recessed ceilings, you will have a picture hanging system available throughout the entire space, giving you a flexible way to decorate the walls. The Twister hanging cords may be clicked into any desired location in the rail next to the recessed ceiling.

Hanging rail integrated in corner profile - suitable for recessed ceilings that don't use a side strip

When recessed ceilings are installed during a building project without side strips, then the Ceiling Strip offers many benefits. The Ceiling Strip replaces the corner profile used in recessed ceilings, and at the same time, creates a completely invisible picture hanging system. When this ceiling system is installed, the only element that is visible is a discreet shadow line along the edge of the recessed ceiling where the flexible picture hanging system is hidden. This shadow line can also camouflage any imperfections in the wall, such as those masked by a side strip. Thanks to the integration of the corner bracket and hanging system, the Twister gliders on the hanging cord also disappear completely into the ceiling: the hanging system is fully integrated and not visible.
